Mobile: +91 8360311280

SKILLS

Languages:	Python, SQL, C++, Java
Tools/Platforms:	Power BI, Excel, Jupyter Notebook, Apache Spark, MySQL, Docker
Technical Skills:	Machine Learning, Data Analysis, Data Visualization, Statistics, Predictive Modelling
Soft Skills:	Problem-Solving, Analytical Thinking, Communication, Teamwork, Time Management

INTERNSHIPS

National Microfinance Bank (NMB BANK PLC) <i>Data Engineering Intern</i> Link	Jun 2026 - July 2026
- Engineered a Real-Time Lakehouse Pipeline using PostgreSQL, Debezium, Apache Kafka, Apache Spark Structured Streaming, Apache Iceberg, MinIO, and Docker for real-time data ingestion and processing. - Configured Change Data Capture (CDC) to capture insert, update, and delete events from PostgreSQL and stream changes through Kafka and Spark. - Architected Bronze, Silver, and Gold layers using the Medallion Architecture to transform raw transactional data into cleaned and business-ready datasets. - Validated data quality across 5 dimensions and cross-layer checks, achieving 8/8 PASS results while generating 5 transaction-summary and 2 fraud-summary records in the Gold layer	

PROJECTS

Loan Approval Prediction <i>Python, scikit-learn, Jupyter Notebook</i> GitHub	Nov 2025 – Dec 2025
- Developed a machine learning model to predict loan approval based on applicant features such as income, credit history and loan amount. - Applied data preprocessing and feature engineering, implemented multiple classification models, selecting Logistic Regression as the best-performing model. - Achieved 98% recall, significantly improving the model's ability to correctly identify loan approval outcomes and reduce prediction errors.	
Blinkit Sales Performance Dashboard <i>Power BI</i> GitHub	Sep 2025 – Oct 2025
- Analyzed Blinkit's sales data to understand key business performance indicators in a real-world scenario and identify areas for operational improvements. - Collected, cleaned and transformed sales data, developed Data Analysis Expressions (DAX) measures and data models to calculate Key Performance Indicators (KPI's) and designed an interactive dashboard to present key business metrics. - Strengthened my data analysis and dashboard storytelling skills, improving my confidence in interpreting business data and making data-driven decisions by 85%.	
E-commerce Flash Sales Analysis <i>Jupyter Notebook, python</i> GitHub	Jan 2025 - Apr 2025
- Evaluated the impact of flash sales on product performance and customer engagement using Natural Language Processing (NLP) and Exploratory Data Analysis (EDA). - Performed data preprocessing, text cleaning, feature extraction, and sentiment analysis to uncover customer insights, and identified trends and customer behavior patterns influencing sales through data modeling and visualization. - Enhanced practical skills in data analysis, statistical modeling, and business decision-making through hands-on project implementation, improving overall analytical proficiency by 80%.	

CERTIFICATES

Microsoft Power BI Data Analyst Professional Certificate Microsoft Link	Apr 2026
IBM Data Science Professional Certificate IBM Link	Feb 2026
Data Science Job Simulation British Airways Link	Aug 2025
Google Data Analytics Professional Certificate Google Link	Apr 2025

EXTRACURRICULAR ACTIVITIES

- Discipline Leader:** Supported the maintenance of student discipline and contributed to a positive and orderly school environment. (Mar 2022 -Jan 2023)
- Vice President (Student Council):** Led student council initiatives and organized school-wide events. (Jun 2019 – Apr 2020)
- Sports Leader:** Coordinated inter-school sports competitions and promoted teamwork and sportsmanship. (Feb 2018 –Apr 2019)

EDUCATION

Lovely Professional University Bachelor of Technology Data Science and Data Engineering; CGPA: 8.46	Punjab, India Aug 2023-Present
Baobab High School Intermediate PCM; Division 1.7	Pwani, Tanzania Jul 2021- May 2023
Heritage Secondary School Matriculation Division 1.9	Pwani, Tanzania Jan 2017 – Dec 2020
